How could we live without the Internet? That's how most of us keep in touch with friends, research a cool place to visit, or find out the latest news. You can use it to do research for school, find out what movie is on near you, check out a college you're thinking about, or find a job or volunteer opportunity. Almost anything you can think of has a website about it.

You've probably heard stories about people who get into trouble in chat rooms. Because users can easily **keep anonymous**, you may be cheated (欺骗) in the chat room. Everyone in the chat room looks like wearing a mask(面具). Chat rooms often attract people who are interested in more than just chatting. They will sometimes ask visitors for information about themselves. The information might be about their families, or where they live. It shouldn't be given away.

Usually, the people who request personal information like home addresses, phone numbers, and email addresses use the information to do some illegal (违法的) things. This might harm a person's or family's well-being (财产).

Do you ride a bicycle? More and more people enjoy traveling or going to work by bike now, but do you know what the origin (起源) of bicycles is?

The early bicycles were first made in Germany in 1817. At that time, they looked like scooters (滑板车) and didn't have pedals (踏板). Then, around 1870, a new bicycle named the "high-wheeler" appeared. This kind of bicycle had one large wheel at the front and a small one at the back. The front one was as high as 5 feet. That's why it was named the "High-wheeler".

About 15 years later, an English bicycle businessman made the first bicycle that was very safe. The wheels on his safe bicycle were both the same size. Also, the size was smaller than before. That made it easier and safer to ride.

But during the early 1900s, many cars were made. People lost interest in riding bicycles because they wanted something faster.

Today, more and more people are interested in riding bicycles because it's good for their health. Riding bicycles now is more like a sport than a kind of transportation.
