If you drive in New Zealand, it is necessary for you to take a little time to learn the road rules—for your own and others' safety. There are a few things that you might find different from driving in your country. Here's some information to help make your driving experience in New Zealand a safe and enjoyable one.

<p style="text-align: center;">Keep left</p> 	<p>In New Zealand, traffic travels on the left-hand side of the road and the driver sits on the right of the car. When you are turning, you should be careful to the left side. Remember to keep your eyes on the road ahead. It is easy to draw your attention to the beautiful parts in New Zealand</p>
<p style="text-align: center;">One lane (人行道) bridge</p> 	<p>Many roads in New Zealand have one lane bridges on them. Any of the signs shown in the left picture mean that you are coming to a one lane bridge.</p>

	<p>Slow down and check for traffic coming the other way. The smaller arrow (箭头) shows which direction has to give way.</p>
<p>Animals on the road</p> 	<p>Watch out for farm animals on the road, especially in the countryside. When you see them, please slow down. You may need to stop and let the animals go past you or move slowly up behind and follow the farmer's instructions.</p>
<p>Seatbelts</p> 	<p>It is a law that all the drivers must wear their seatbelts. If you are caught not wearing your seatbelt, you will be fined.</p>

More information on road safety, including the New Zealand Road Code are available (可得到的) by going to www.nzta.govt.nz or by phoning New Zealand Transport Agency 0800 699 000 or visit aa.co.nz.

(1) When you are coming to a one lane bridge, you can see _____ .

- A. 
- B. 
- C. 
- D. 

(2) Which one is NOT the road rules when you drive in New Zealand?

- A. When you are turning, you should be careful to the left side.
- B. You should slow down when you see animals

- C. If you don't wear your seatbelt, you will be fined.
- D. You should drive on the right.
- (3) You can get more information by _____ .
- A. going to www.nzta.govt.com
- B. phoning 0800 669 0000
- C. going to www.nzta.govt.newz
- D. visit aa.co.nz

3D printing technology may not be a new thing in some foreign countries. But in May this year, at Shenzhen Convention and Exhibition Center (深圳会展中心) . Many visitors were attracted by a 3D printer.

The machine looks similar to an ordinary printer and can print a "statue" in about 90 minutes after scanning anything, including a person.

The printer prints layer by layer (层) . For example, if we want to print a 30-cm-tall statue, the computer will calculate the layers and print 460 layers in total. It can also print people and clothes. You can stand for scanning for just about three minutes, and a statue will be finished about two hours. The cost for a statue of a man is about 1000yuan. The printer, which costs about 500,000yuan, is from the USA.

"We want to introduce this technology to people, and find more chances here." said an engineer, "There is a company in USA that offers 3D printing services to people. Many people come to design their own thing. It is very cool. We hope that the printer will encourage more Chinese people to be more creative."

- (1) A 3D printer _____ .
- A. is a common machine
- B. prints layer by layer
- C. can make clothes and people
- D. is widely used in Shenzhen
- (2) How much should you pay if you want to have a statue of yourself printed?
- A. 50,000yuan
- B. 1000yuan
- C. 500,000yuan
- D. 100yuan
- (3) The engineer showed people the 3D printer to _____ .

- A. design new things
- B. print statues for them
- C. introduce this technology and find changes
- D. calculate the layers

(4) We can find the article in _____ .

- A. a travel guide
- B. a restaurant menu
- C. a news paper
- D. a text book

19. Around the world, young people are spending unbelievable sums of money to listen to rock music. It's reported that at least fifty rock stars have incomes (收入) between two million and six million dollars per year. "It doesn't make sense," says Johnny Mathis, one of the older music millionaires, who made a million dollars a year when he was most popular, in the 1950s. "Performers aren't worth this kind of money. In fact, nobody is."

But the rock stars' fans seem to disagree. Those who love rock music spend about two billion dollars a year for records. They pay 150 million to see rock stars in person. Luck is a key word for explaining the success of many stars. In 1972, one of the luckiest was Kon McLean, who wrote and sang "American Pie". McLean writes his own music, so he earns more out of the record of the song about a million dollars.

How do the rock stars use their money? What do they do when the money starts pouring in like water? Most of the young stars simply throw the money around. England's Elton John gave someone a \$ 38, 000 Rolls Royce automobile and bought himself a pair of eyeglasses for \$ 5, 000 that light up and spell ELTON. He also bought himself two cars, "one for each foot".

Many rock stars return from a tour (巡回演出) , pay their bills, and buy new toys. Then when they need money again, they do another tour. They save no money, buy no stocks, and **live from hand to mouth.**

(1) What is the probable incomes of the rock stars according to the passage?

- A. 1 million
- B. 3 million
- C. 9 million
- D. 7 million

(2) _____ pay 2 billion dollars a year for records?

- A. Rock stars
- B. Kon Mclean
- C. Peck music lovers
- D. Performers

(3) Elton John used his money to buy himself _____ .

- A. a pair of eyeglasses for \$5,000

- B. a Rolls-Royce car
- C. two \$38,000 cars
- D. new toys

(4) The underlined words can be replaced by _____ .

- A. are short of money
- B. live a hard life
- C. earn money now and spend money now
- D. earn money now and spend money later

20.

D

Jack Ma, founder and chairman of China's e-commerce giant Alibaba, on Monday met with U.S. President-elect Donald Trump, and they discussed plans to help U.S. small businesses sell products to China through the company's platform.

"I think the president-elect is very smart, he's very open-minded to listen. I told him my ideas about how to improve trade, especially to improve small business, cross border trade (跨境贸易) ," Ma told reporters at Trump Tower in New York after meeting with Trump.

They also discussed the China-U.S. relationship, which should be "strengthened" and "more friendly", according to Ma. "Trump has concerns, and he has solutions, that he wants to discuss with China and us," he said.

"We had a great meeting, and a great, great entrepreneur (企业家) , one of the best in the world," Trump told reporters after the meeting. "Jack and I are going to do some great things."

Alibaba group said on Monday via its official twitter that the company works with U.S. companies and farmers to sell to over 450 million Chinese consumers on its platform, and it has set a goal of helping one million U.S. small businesses export to China.

(1) What did Jack Ma think of Present Trump?

- A. clever
- B. ordinary
- C. shy
- D. outgoing

(2) Jack Ma meet with Present Trump _____ .

- A. at Alibaba
- B. on the company's platform
- C. at Trump Tower
- D. in China

(3) Alibaba works with American companies and farmers to sell _____ products on its platform.

- A. less than 450,000,000

- B. more than 450,000,000
- C. over 450,000,000,000
- D. less than 450,000,000,000

(4) The passage mainly talks about that _____ .

- A. Jack Ma and Present Trump became friends.
- B. Alibaba set a goal of helping.
- C. Jack Ma will support 1 million small business of America.
- D. Jack Ma and Preent Trump discussed plans to help American small business.

Power is the energy that makes things around us work, such as the solar power. Paper, is the sheets we write on. It can also have power.

What is paper power?

Does the power paper have abilities to do something in a particular way? Power paper is nothing but a paper in battery! What is special is that it looks like a very thin plastic sheet. It stores electric power like ordinary batteries do.

How much energy can paper batteries produce?

A power paper battery can produce the same amount of power as a watch or a calculator. That is not much right? But many power cells (电池) can be put together to produce more power. The power paper gets charged (充电) in only a few seconds.

This magazine technology can help people come up with many creative new ideas. If the batteries reduce in size, the size of gadgets (小配件) can reduce even further. As a result, the electronic product can be much smaller. In the past few years, we have seen the size of our electronic products like watches can be even smaller and smaller. Now with the power paper, many products like watches can be even smaller and more creative.

The power paper has several advantages. There will be no need to wait for hours to get our batteries charged. No need to carry large batteries to charge our electronic products. The most important is that it will also change the way we recycle our batteries. Disposing (处理) of paper batteries will be environment friendly.

(1) What is the difference between ordinary batteries and the power paper?

- A. The power paper looks like a thin plastic sheet.
- B. The power paper is plastic.
- C. The power paper stores electric power.
- D. The power paper dose everything.

(2) The power paper may be charged in _____ .

- A. 3 minutes
- B. 3 hours

- C. 3 seconds
D. 3 days
- (3) What is the subtitle of the 4th paragraph?
A. The power paper can change nothing.
B. How can batteries become smaller and smaller?
C. How will the power paper help us in the future?
D. Can watches become smaller?
- (4) The power paper have many advantages **EXCEPT** _____ .
A. You can carry small batteries to charge electronic products.
B. You can use the power paper to do something creative.
C. You only need to wait for a short time to get batteries charged.
D. You don't need to worry about the environment problems when using it.

语法填空

22. Is your schoolbag too heavy to carry? The e-schoolbags will give a hand to you.

It is 1 (say) that e-schoolbags are going to be brought into use in Chinese middle schools soon. It is 2 small computer for students. Heavy schoolbags have been a serious problem 3 them . But the e-schoolbag will change everything. It is much 4 (light) than a usual schoolbag. Also it is as small as a usual book, 5 it can still hold all the things for study, 6 (include) textbooks and exercise books. They can be made into chips (芯片) 7 are as small as a stamp. The students can read the text page by page and even send e-mails to teachers. All they have to do is 8 (put) the right chip into the e-schoolbag and press a button.

Some say that e-textbook can be 9 (easy) broken. Others say it is not good to 10 (student) eyes because giving too much attention to it will be harmful to eyesight. But **only** time will tell.
