Madame Curie is **one of the greatest scientists** in the world. She was born in Poland in 1867. From her childhood, she was diligent and loved to study. At 24 she left for Paris and entered Paris University for further study.

In 1894, Pierre Curie appeared into her life **for the reason that** they are both interested in physics. They soon fell in love with each other and then married. Madame Curie **devoted her whole life to scientific research** and she won the Nobel Prize for physics in 1903 and for chemistry in 1911, **which was the first scientist to win the Nobel Prize for twice.**
