2:begins

20 1:How

2:relaxed

21 There is no wonder that every teacher wants his or her students to study hard. So they are always strict with all of you. In my opinions, the most important thing that you should do is to explain the misunderstanding and you may tell the truth. In that way, he will feel proud of you for you are really eager to make more progress with math.

In fact, you have to keep in mind that our teachers hope all of us to do well in our studies. If you have any problems, you can keep in touch with them to show your feeling in time. On the one hand, we should focus on class without speaking to others. On the other hand, we should trust our teachers who are always patient to us all the time. Moreover, try to persuade your classmate's that it is important to pay attention to our classes.
