 - 3:whether this problem can be solved
 - 4:one of Canada's most popular cities
 - 5:some measuring 90 meters

九、书面表达 (15分)

- 26
- The Great Barrier Reef runs 2,300 kilometers along the northeastern coast of Australia and has the largest coral reef in the world. One of the seven wonders of nature in the world, it has all kinds of marine life, including fish, birds and some endangered species.

Instead of flying all the way, I chose to fly to Brisbane, then took the train to Cairns, then took a boat trip and enjoyed the beautiful scenery all the way. When I experienced the snorkel, I was surrounded by colorful coral and dolphins and sea turtles.

What worries me is that coral on the Great Barrier Reef is dying in large areas due to global warming and rising sea temperatures, and other species are threatened by water pollution and overfishing. We hope people can work hard to protect the environment.
