10: How

## 五、书面表达 (共15分)

23

With the development of AI, some traditional industries are gone. We had a discussion about whether we need protect the traditional techniques or not last Monday morning.

Some students hold the view that we don't need to protect the traditional techniques due to the following reasons. First, it is natural for new things to take the place of old things. Second, the traditional techniques can't keep pace with the society. What's worse, some new techniques can save a large amount of time and energy. However, others think it necessary to protect the traditional techniques because they are the symbols of the ancient Chinese splendid culture. Some of them still make our life more convenient and comfortable now.

Personally speaking, I think we should not only protect the traditional techniques, but also update them to make them adjust to the society.
