(本大题共6小题，每小题1分，共6分)

28 读短文，判断句子与短文内容是否相符，如相符在括号内写“T”，否则写“F”。

What is the biggest animal in the world? The whale is. Is the whale a kind of fish? No. It looks like a fish and lives in the sea, but it is really a mammal (哺乳动物) . The babies drink milk from the mother's body. A whale weighs more than a hundred tons (吨) .

Every spring, whales swim to warm places. Each group goes to the same place every year. The mothers take their babies with them. Whales are friendly to each other. They always live together and help each other. They "talk" to each other in the water with high voice that sounds like singing. They are very cute.

But people kill more than a hundred whales a day. They kill them to make many things. The whales are in danger. If people go on doing things like that, the whales will disappear forever. We must do something now and save them together.

1. The whale is the biggest fish in the world.

2. The mother whale feeds the baby whale with milk.
3. The whales like to live in cold places in spring.
4. The whales are nice to each other.
5. The whales "talk" with big voice that sounds like crying.
6. If people don't stop killing the whales, there will be no whales some day.
