Life in the future

We held a class meeting about "Life in the future" last week. Students expressed their different ideas in class. Some people thought the world will become better and better. And it will improve the life level of people in a few years. At the same time, people will live longer.

Others held a different idea and they thought the world will become crowded. Because of that, it will have more environmental problems. We will also have less resources.

In my opinion, all of them express some facts. As a matter of fact, we shouldn't only see one side of the coin. We should try our best to protect our environment and find out what we can do. And then we should focus on our health and keep doing exercise.
