十、书面表达

- 41 It is reported that people have cut down lots of trees in the last few years. If we continue cutting down trees, we will have no trees sooner or later. As we all know, trees have many uses in our daily life. We can make wood into desks, chairs and paper. We also can use wood to build houses. Trees can not only make the air clean, but also produce oxygen. What's more,

trees can prevent water from washing the earth away. In a word, trees are important to humans. So we must plant more trees and prevent people from cutting down too many trees. We'd better not use paper cups which can be used only once.
