2:been

3:sent

4:to

## 七、书面表达

---

20

### My Home Study Life

Due to the influence of covid-19, schools across the country have delayed the start of classes and offered online courses. The teachers give us live lectures on the app. And we need to send the homework to the teacher through the Internet after class. I believe I can learn online lessons well. Through online learning, students can learn anytime and anywhere. But looking at the computer screen for a long time will affect our eyesight. In order to enrich my life, I spare time after supper to do some favorite things, such as doing sports and listening to music. I also help my parents do some housework when I am free. To protect ourselves from epidemic, I wear medical masks when I go out and often wash my hands.
