Jackie's Blog

To control the coronavirus outbreak, schools in many cities including Guangzhou and Beijing have put off the beginning of the spring semester, and started online courses.

In modern world, surfing the Internet seems to be a fashion. It has its advantages and disadvantages. Some parents think that it's a good way to save time, because they don't need to pick up their children from school, which let them have free time to do other things. And these

teachers are for it. Their opinion is that live teaching makes students speak more actively in online class. Almost everyone has a chance to speak what they want to say really. Everything has two sides. Some are against it, because it is harmful for health and kids' eyesight. What's more, students tend to be distracted by attending classes at home.

In my opinion, we'd better make full use of the advantage of living teach and avoid its weakness. Because it's really good for personalized learning.
