七、书面表达

21 *Nowadays many Chinese students no longer pay much attention to handwriting. They believe their keyboards can do the work. However, I think that handwriting is still Important.* Writing is an important part of Chinese traditional culture, so practising writing helps to inherit culture. Everyone's handwriting has personal meaning, for example, handwritten letters can express emotions better. I also think handwriting can improve students' handwriting skill and interests; for another, it can teach students to love Chinese characters. In my view, practising handwriting can make students improve both their bodies and minds. For middle school students, it is quite beneficial to write beautiful and generous words. So it is necessary to hold handwriting contests among students.
