### Our school in the future

In the future, with rapid progress of science and technology, our life will change a lot. I think our school will be quite different. First, there is no teacher in our school. Many robots can teach us lessons. Second, the students won't have to use the text books at school, they will get more knowledge on the Internet. Finally, they won't have to write their homework, they will finish it by

sending their teachers emails.
